

## Curtiss-Wright Reports: Sales and Operating Income Up 84% & 81%, Respectively; Backlog & New Orders are at Record Levels

ROSELAND, N.J., April 30 /PRNewswire-FirstCall/ -- Curtiss-Wright Corporation (NYSE: CW, CW.B) today announced financial results for the first quarter ended March 31, 2003. The highlights for the first quarter are as follows:

- Net sales increased 84% to \$179,333,000 in the first quarter of this year from \$97,787,000 in the first quarter of 2002 and 2003 contributed \$75,318,000 to sales in the 2003 first quarter. Despite a difficult economic environment, sales from our base business rose 7% in the first quarter of 2003 over the comparable prior year period.
- Operating income in the first quarter of 2003 increased \$1% to \$23,345,000 from operating income of \$12,914,000 in the prior year same period. Acquisitions made in 2002 and 2003 contributed \$10,016,000 to operating income in the 2003 first quarter. Operating income from our base businesses increased 3% in the first quarter of 2003.
- Net earnings for the first quarter of 2003 were \$14,122,000, or \$1.36 per diluted share, a 52% increase from \$9,316,000, or \$0.90 per diluted share for the same quarter of 2002.
- New orders received in the first quarter of 2003 were \$205.952.000. up 114% compared to the 2002 first quarter. Approximately 60% of the new orders received in 2003 were military related.
- Backlog increased 6% to a new record high of \$509,279,000 from \$478,494,000 at December 31, 2002.

The total sales increase of the 2003 first quarter over the 2002 first quarter was due to both increases in some of our base businesses and acquisitions. Higher sales of flow control products to the nuclear navy, the nuclear power generation, oil and gas, and European valve markets, higher sales from our domestic ground defense business, and higher shot peening services, all contributed to the growth in base businessess. Sales to the commercial aerospace OEM market, as expected, were down for the quarter. Excluding the contributions from the acquisitions consummated in 2002 and 2003, sales of the base businesses increased? Six in the liters quarter of 2003 compared to the prior year period.

Curtiss-Wright's first quarter 2003 performance was highlighted by strong results from our operating segments. Increased business segment operating income in 2003 more than offset the decrease in the Company's 2002 nonoperating pension income. Operating income from our business segments increased \$9,961,000 for the first quarter of 2003 as compared to last year's comparable period. The increase in operating income equates to improved earnings per diluted share of \$0,63 for the first quarter of 2003 as compared to the prior year. The higher operating income is mainly due to the higher sales volume as described above.

Martin Benante, Chairman and Chief Executive Officer of Curtiss-Wright commented, "We are proud to report higher sales and operating income for the first quarter of 2003 over the same period last year despite challenges in some of the markets we serve. While sales have greatly benefited from our acquisition program, we have also seen storing performances in our base businesses with good internal growth in both sales and profits. Curtiss-Wright has experienced growth in 2002 and 2003 in markets where most companies have engenienced major products and septomers. In a spower generation, gas and oil processing and industrial markets. Curtiss-Wright has also experienced growth in our reval, military acrespace, land as aerospace market has been particularly challenging, but our increase in military aerospace for the most part has offset the commercial downtum. Our diversification strategy is producing the balance of business that has allowed us to continue achieving profitable growth from our business sense period last year despite the profit of the profit

In addition, the projected increase in military procurement spending to the highest levels in over a decade should provide opportunities for us in the future. Our position on many defense programs is outstanding, with a mix of products for aerospace, land-based and naval defense platforms, which have never been stronger. This balanced blend of defense programs will provide both short and long-term benefits."

## Segment Performance

Flow Control -- First quarter of 2003 sales for this segment were \$93.3 million, up 210% over the comparable period last year. The higher sales reflect the acquisitions of the Electro-Mechanical Division of Westinghouse Government Services Company ("EMD") and TAPCO International, Inc. in the fourth quarter of 2002. In addition to the benefits from these acquisitions, we experienced sales growth of 23% in our base businesses, which was driven by stronger sales of products for both the traditional and non- traditional naval markets, gas and oil and commercial power generation markets, and higher valve sales to Europe.

Overall, operating income for this segment increased 292% for the first quarter of 2003 compared to the comparable prior year period. EMD posted strong results due to favorable sales mix and higher productivity. In addition to the benefit of acquisitions, increased operating profits from our base businesses contributed to the higher overall operating income. Operating income of our base businesses improved 39% from the prior year. Margin improvements on flow control products for commercial nuclear applications, European valve, gas and oil, and heavy truck markets, as well as overall osst reduction programs contributed to the travorable operating income performance.

Motion Control — Sales for the first quarter of 2003 of \$57.0 million increased 35% over last year due principally to the acquisitions of Collins Technologies in February 2003 and Penny & Giles and Autronics in April of 2002. The base business did experience lower sales due to the reduction in commercial aircraft production by Boeing and a slight drop in the European ground defense business. These lower sales were partially offset by stronger domestic ground defense sales primarily related to the expedited deliveries of the Bradley fighting vehicles and an increase in sales of military aerospace products for both CEM and sparses. The business segment also benefited from florarbible currency translations.

Operating margins for the first quarter of 2003 were down compared to last year. Lower margins were driven by lower sales volume as mentioned above, unfavorable sales mix, and higher than planned research development costs for our European ground defense business and a portion of our electronics business. The contributions from our acquisitions of \$1.3 million partially offset these declines.

Metal Treatment -- Sales for the first quarter of 2003 of \$29.6 million were 16% higher than the comparable period last year. The improvement was mainly due to higher sales of shot peening services, especially in Europe, which services the aerospace and automotive industries, and from the contributions from the 2002 and 2003 acquisitions. In addition, sales from our new laser technology also contributed to the higher sales for the quarter. Foreign exchange translation had a favorable impact on sales.

Operating income increased 36% for the first quarter of 2003 as compared to the first quarter of 2002. Higher sales volumes produced the higher operating margins. Margins for the quarter benefited from favorable currency translation of approximately \$0.5 million.

Mr. Benante concluded, "We begin the year 2003 confident in our ability to build on our solid business foundation and generate long-term shareholder value by increasing sales and earnings. Although 2003 is likely to present a challenging business environment, the first quarter results illustrate our ability to increase shareholder value by executing our strategies and achieving our financial targets as we have indicated we would at the end of 2002. Our diversification strategy and ongoing emphasis on technology will continue to generate growth opportunities in each of our three business segments.

\*\*\*\*\*\*\*

The Company will hold a conference call with financial analysts to discuss the first quarter 2003 results at 10:00 a.m. Eastern Time, Thursday, May 1, 2003. A live webcast of the call can be heard on the Internet by visiting the company's website at www.curtisswright.com and clicking on the investor information page or by visiting other websites that provide links to corporate webcasts.
